DOUBLE EYELID STITCHING & PERMANENTLY DOUBLE EYELID

Double eyelid stitching, also known as suture technique double eyelid, is a minimally invasive cosmetic procedure used to create a double eyelid fold without making any incisions. It involves placing sutures through small punctures in the eyelid to create and reinforce the desired crease. This method is often preferred for individuals who want a more natural-looking double eyelid and a faster recovery.

Eyelid fat removal, is a technique to address excess fat, correcting the appearance of baggy or droopy eyelids.

Upper eye skin removal is a surgical procedure that removes excess skin and fat from the upper eyelids to improve vision and reduce the appearance of droopy eyelids. It can be performed for functional reasons (when droopy eyelids obstruct vision) or aesthetic reasons (to create a more youthful appearance).

BROWLIFT TREATMENT

A sub brow lift is performed by making an incision exactly underneath the eyebrow. The excess surrounding skin and muscles are then excised, tightened and sutured, significantly reducing sagging without making any changes to the existing double eyelid crease. The resulting scar is hidden beneath the eyebrow, with the stitches typically removed after 1 week.

COLLAGEN STIMULATOR

Collagen stimulator treatment is a cosmetic procedure that increases collagen production in the skin to improve its appearance. It can help with wrinkles, volume loss, and skin firmness.

Package A

JUVELOOK MADE IN KOREA

Skin analyzer · Dynamic Pulse Light skin rejuve · PLLA collagen stimulator

INDICATION For treatment of severe facial wrinkles, folds, and replacement of facial contour deformities. Helps to restore natural volume for aging skin lost collagen.

INGREDIENTS 365mg of poly L-lactic acid (PLLA)

DISC 45%
~~11.360.000~~
6.248.000

Package B

GOURI MADE IN SOUTH KOREA

Skin analyzer · DPL skin rejuve · PCL collagen stimulator (Gouri)

INDICATION Rejuvenated skin by promoting collagenesis on the entire face. Spreading naturally on the entire face, collagen stimulator generates collagen synthesis which has decreased due to the skin-aging

INGREDIENTS 21% of polycaprolactone (PCL)

DISC 55%
~~10.323.000~~
4.645.350

Package C

JALUPRO SUPER HYDRO MADE IN ITALY

Skin analyzer · DPL skin rejuve · Hyaluronic acid stimulator (Hyamed)

INDICATION This treatment are used to treat facial ageing, sagging, laxity and neck lines by injecting hyaluronic acid and stimulating collagen regeneration to hydrate and lift the skin.

INGREDIENTS Hyaluronic acid 32mg/ml

DISC 42%
~~7.548.000~~
4.377.840

Package D

ELLANSÉ MADE IN THE NETHERLANDS

Skin analyzer · DPL skin rejuvenation · Ellansé (1 syringe)

INDICATION This treatment is designed to restore age-related facial volume loss while stimulating long-term neocollagenesis. Ellansé provides immediate structural support through its carboxymethyl cellulose (CMC) carrier and gradually stimulates new collagen formation via polycaprolactone (PCL) microspheres, helping improve facial contour, skin firmness, and overall facial rejuvenation.

INGREDIENTS Polycaprolactone (PCL) microspheres · Carboxymethyl cellulose (CMC) gel carrier
